FULLSTACK DEVELOPER

<https://portfolio.chaumanh.site>

<https://linkedin.com/in/chaumanh1108>

OBJECTIVE I'm a Fullstack Developer with hands-on experience building and deploying web applications using React.js, Node.js, Express.js, NestJS, SQL, NoSQL, Redis, Docker, AWS, and GCP. Experienced in designing RESTful APIs, authentication, payment integration, caching, and cloud deployment. Seeking a Fullstack Developer role where I can contribute to scalable systems, improve my Fullstack engineering skills.

EDUCATION **University of Information Technology - Vietnam National University (VNU-HCM) (2022 - 2026).**
Bachelor of Information Technology.
English: TOEIC 725

TECHNICAL SKILLS
Frontend: HTML, CSS, Tailwind CSS, React.js, Next.js.
Backend: JavaScript, TypeScript, Node.js, Express.js, Nest.js, RESTful APIs, Microservices, RabbitMQ.
Database: MySQL, PostgreSQL, MongoDB, Redis, Prisma, TypeORM.
DevOps: Linux, Ubuntu, Docker, AWS, GCP, Jenkins CI/CD with GitHub.
Others: Git/GitHub, Postman, Java Spring Boot.

SOFT SKILLS Able to read technical documents in English; strong communication, teamwork, self-learning, and problem-solving skills.

EXPERIENCE

BACKEND DEVELOPER

Aug 2025 – Dec 2025

Company: Diko Vina Co., Ltd

- Worked in an Agile/Scrum team to design and optimize the database architecture for an Interactive Gamified Photobooth Platform combining photo-taking, coupons, and game-based rewards.
- Designed and implemented core RESTful APIs using Express.js, PostgreSQL, and ORM for authentication, user management, coupon, and gift modules.
- Engineered an automated QR code module: handled photo uploads to Google Cloud Storage, generated 3-day signed URLs for secure access, and dynamically embedded them into QR codes.
- Integrated the KakaoTalk API to automate and streamline user messaging and notifications.
- Supported the deployment pipeline, containerized the backend for Google Cloud Run via Docker, managed the database with Cloud SQL, and deployed the frontend to Firebase Hosting.

BACKEND DEVELOPER INTERN

Jun 2025 – Jul 2025

Company: Diko Vina Co., Ltd

- Participated in onboarding and technical training, gaining familiarity with professional software development workflows.
- Practiced full-stack development by cloning existing websites, designing MySQL databases, building RESTful APIs with Express.js, and integrating APIs with the frontend team.

PROJECTS

DINE-IN & FOOD ORDERING SYSTEM

Dec 2025 – Present

Scalable food ordering and dine-in website with integrated payments and QR-code table session management.

Role: Fullstack Developer **Team size:** 1

Links: GitHub, Website

Technologies: Next.js, Nest.js, TypeScript, Microservices, RabbitMQ, PostgreSQL, Prisma, Redis, Docker, AWS.

- Architected a Nest.js microservices backend with RabbitMQ, Prisma, PostgreSQL, and Redis, applying Request-ID tracing for centralized logging and easier debugging across services.
- Implemented Role-Based Access Control (RBAC) with custom NestJS decorators and guards to manage roles for Admins, Staff, and Customers.
- Developed QR-code table session management, enabling dine-in customers to place orders by table while ensuring consistent session status and order synchronization.
- Integrated PayOS payment gateway with asynchronous RabbitMQ-based webhook processing to synchronize payment status reliably across services.
- Improved API performance with Redis caching, API pagination, and secure OTP storage.
- Built responsive user interfaces with Next.js and Tailwind CSS, utilizing Context API for global state management and custom layouts for role-based routing Admin, Staff, User.
- Deployed containerized microservices on AWS using ECS, ALB, RDS, Amazon MQ, S3/CloudFront, VPC, and Secrets Manager.

WEATHER FORECAST WEBSITE

May 2025 – Jun 2025

Nest.js-based weather forecast website featuring city detection and global weather search.

Role: Fullstack Developer **Team size:** 1

Links: GitHub, Website

Technologies: React.js, Nest.js, MySQL, OpenWeather API, Docker, AWS.

- Built modular Nest.js backend services for Auth, User, City, and Weather modules using TypeORM and MySQL.
- Integrated OpenWeather APIs with reverse geocoding to support city detection, global weather search, and real-time weather data retrieval.
- Implemented secure JWT access/refresh authentication using httpOnly cookies, Passport strategies, guards, and centralized exception filters.
- Deployed the application on AWS with S3/CloudFront for frontend, Docker Compose/Nginx on EC2 for backend, and ACM/Route 53 for SSL/DNS management.

E-COMMERCE WEBSITE

Feb 2025 – May 2025

Sports e-commerce website integrated with a RAG-based AI chatbot.

Role: Backend Leader **Team size:** 4

Links: GitHub, Website

Technologies: React.js, Express.js, MongoDB, Redis, Firebase, OpenAI API, Socket.io, PayOS, Docker, AWS.

- Designed and implemented RESTful APIs for authentication, product, cart, order, and payment modules.
- Integrated PayOS with asynchronous webhook processing and real-time order status updates using Socket.io.
- Developed custom middlewares for JWT authentication, centralized error/response handling, and secure file uploads; integrated Firebase for Google OAuth 2.0.
- Improved API performance with Redis caching, API pagination, and secure OTP storage.
- Built a RAG-based AI chatbot using OpenAI API, text chunking, and embeddings for product recommendations.
- Deployed the system on AWS with EC2, Docker Compose, Nginx, S3/CloudFront, Jenkins CI/CD, ACM, and Route 53.
